Metadata View Column Descriptions

For columns regarding eGauge circuits, if the field reads “yes”, there is data from the circuit in the eGauge data tables. If the field is blank, there is no data from the circuit in the eGauge data tables, although it is possible that the home has that type of circuit and it was not prioritized for monitoring.

Column Name	Description
dataid	The unique identifier for the home. To be more precise, this is the unique identifier for the home-resident pair. Thus, if a resident moves, the data collected from the house is associated with a new data ID.
active_record	This field will show “yes” if

		...can be blank otherwise.
building_type		This field will read "Single-Family Home" if this is a freestanding single-family home, "Town Home" if it is a home that shares at least one wall with a neighboring house, or "Apartment" if it is an apartment.
program_579		This field will show "yes" if this participant is part of the 579 program and will be blank otherwise. The defining feature of the 579 program is that it includes participants in Texas outside the Austin area.
program_baseline		This field will show "yes" if this participant is part of the Baseline program and will be blank otherwise. Baseline program participants

		then data for the first year of the study (2011- 2012) and then were given a report with the details of their energy use. Data was collected for another year (2012-2013) for comparison, to see whether the participants reduced their energy use.
	program_energy_internet_demo	This field will show “yes” if this participant is part of the Energy Internet Demonstration program, which includes most Austin, Texas participants enrolled prior to 2014.
	program_lg_appliance	This field will show “yes” if this participant is part of the LG Appliance Trial and will be blank otherwise. These participants received new washers, dryers, and, in some cases, refrigerators

		dryer monitored on their eGauge, it will have been replaced with an electric dryer at the time of the trial.
	program_verizon	This field will show “yes” if this participant is part of the Verizon program, which involves exclusively residents of four low-income apartment complexes in Austin, Texas. Most of these participants do not have home internet access, so each household was given a tablet to facilitate their ability to view their energy use on their eGauge monitoring system from home.
	program_ccet_group	This field will show one of the following group labels if the participant was a member of the CCET Trial:

		<p>group labels in the participant is a member of the Civita project:</p> <p>Civita - Control Civita - Text Message</p> <p>Text Message participants received text messages asking them to conserve energy in various ways. Control group participants were not affected.</p>
	program_shines	This field will show “yes” if this participant is part of Shines program. For more information check out our blog here .
	city	The city in which this residence is located.
	state	The state in which this residence is located.
	pv	This field will show “yes” if this participant has a solar photovoltaic system installed at

pv_panel_direction	Direction solar panels are facing
total_amount_of_pv	Size of pv system.
amount_of_south_facing_pv	Size of pv system facing south .
amount_of_west_facing_pv	Size of pv system facing west .
amount_of_east_facing_pv	Size of pv system facing east .
date_enrolled	The date on which this participant enrolled with Pecan Street.
date_withdrawn	The date on which this participant withdrew from participating with Pecan Street. If this field is blank, the participant is still enrolled.
house_construction_year	The year in which this home was constructed.
total_square_footage	The total square footage of the home.
first_floor_square_footage	The square footage of the first floor of the home.
second_floor_square_footage	The square footage of the second floor of the home.

	generated by second solar photovoltaic system.
sprinkler1	Sprinkler system circuit eGauge data present.
sumppump1	eGauge data present for a pump used to remove water that has accumulated in a water-collecting sump basin, commonly found in the basement of homes.
utilityroom1	Utility room circuit eGauge data present.
venthood1	Vent hood circuit eGauge data present.
waterheater1	Electric water heater eGauge data present.
waterheater2	Second electric water heater eGauge data present.
wellpump1	eGauge data present for water pump to pump water out of water well.
winecooler1	Wine cooler circuit eGauge data present.
